

HID FARGO® Connect™ Console

KEY FEATURES:

- User-friendly, touchscreen interface
- Centralized management and control of multiple in-network FARGO printers
- Online tutorials and support
- Industry-leading security

WHAT IS FARGO CONNECT?

HID® FARGO® Connect™ is a revolutionary, cloud-based, integrated platform for managing all aspects of your secure card issuance program. Combining hardware, software, consumables, and services, the solution simplifies the operation and support of an ID card issuance office while increasing control and security.

SECURELY AND EASILY MANAGE SECURE CARD ISSUANCE FROM A CENTRAL, TOUCH-SCREEN CONSOLE

- **Tap into the cloud and take card issuance program management to the next level** – Print, encode, troubleshoot, reorder consumables, and manage card printers and print jobs from a centralized, easy-to-use, cloud-based console.
- **Leverage industry-leading security** – Secure technology that include elements provided by NXP™ and IdenTrust™, transform your in-network card printers into trusted end points within the IoTT (Internet of Trusted Things) – while contact reader-based user access safeguards against unauthorized system use.
- **Manage multiple printers from a central interface** – A single FARGO® Connect™ Console can manage up to six printers and encoders – simplifying and accelerating secure card issuance at the source.
- **Enjoy ease-of-use** – A simple, intuitive touchscreen interface walks users through all print and management functions, online tutorials, and support requests.

The **HID FARGO Connect Console** is a tablet-like, multifunctional appliance with an intuitive, touchscreen interface that allows users to securely manage virtually every aspect of their ID card print jobs within the HID cloud. Now you can remotely access and manage your Ethernet-connected HID FARGO printers within a secure cloud-based application all from a centralized, user-friendly console – and without the use of an expensive-to-maintain, dedicated desktop PC. Authorized users can print, and encode cards – or troubleshoot and manage print jobs for up to six printers from a single console.

What’s more, from the HID FARGO Connect Console, you can view printer network configurations and active print queues – allowing you to delete or manage print jobs on-the-fly. The console also automatically detects and displays key status information such as printer offline or other errors – taking the guesswork out of diagnosing common print issues.

Easy-to-understand online tutorials and help are also available at your fingertips. From day one, even the most novice of

users will be able to print and encode cards, manage printers and more.

Built-in security technologies including elements provided by NXP and IdenTrust transform your in-network FARGO card printers into trusted end points within the IoTT (Internet of Trusted Things) – while contact reader-based user access safeguards against unauthorized system use. HID FARGO printers now become smart, secure, web-enabled devices capable of leveraging all of the functionality of the FARGO Connect platform – and rigid security standards ensure data transfers are always encrypted.

Beyond its secure printing and management functions, from the HID FARGO Connect Console, you can also reorder printing consumables such as ribbons, overlaminates and cards with ease. Users can even request technical support help through the touchscreen interface.

Call us today and discover how the HID FARGO Connect Console can be your window to the simplicity and versatility of a truly web-enabled, cloud-based issuance solution.

CARD PRINTING FUNCTIONS

- Encode and print IDs and cards from a central console
- Encode magstripe, contact and contactless cards remotely

MANAGEMENT FUNCTIONS

- HID FARGO Connect print job query
- View print queue status and delete unwanted print jobs
- Access tutorials and online help
- Submit technical support requests
- View printer network configurations
- View and troubleshoot errors - printer/network offline, other
- Manage up to six HID FARGO Printers from a single console

SECURITY

- Built-in security technologies including elements provided by NXP and IdenTrust ensure console-managed HID FARGO Card Printers are entirely secure - transforming them into trusted end points within the IoT (Internet of Trusted Things)
- End-to-end encryption of all sensitive data (in transit and at rest)
- Card data remains encrypted until it is printed
- Encryption keys are securely stored in tamper-proof hardware
- Optionally configurable contact reader-based user access safeguards against unauthorized system use

INTERFACE

- Intuitive, touchscreen interface provides access to your cloud-based, FARGO Connect software platform

SPECIFICATIONS

Tablet Operating System	Linux
Processor	64bit ARMv8 Quad Core
RAM / Internal Memory	2GB DDR / 32 GB
Display	7.0" Touchscreen
Capacitive Multi-touch	Yes
Dimensions	8.0" W x 9.0" H x 6.0" D (203 mm W x 229 mm H x 152 mm D)
Software	HID FARGO Connect
Network Requirements	Dual 10/100 Ethernet Ports
USB Ports	1 x USB 2.0 Type - A
